PROLYSTICA®
SO MUCH MORE THAN CLEAN™

You've invested in your washers and instruments and you rely on them to perform for you and your facility every day. Don't compromise on their long-term viability. **Prolystica Restore® Descaler and Neutralizing Detergent** can help restore them from damage caused by repeated exposure to poor quality water, high temperatures, aggressive soils and hundreds of cycles.

PROLYSTICA MANUAL CLEANING and AUTOMATED WASHING

STERIS

RESTORE is Three Products In One

- Descaler/de-stainer
- Passivating Agent
- Neutralizer for alkaline residues

Over time, every instrument and washer feels the effects of water: scale deposits, rust and a decrease in effectiveness. We designed Prolystica Restore Descaler and Neutralizing Detergent to help maintain and restore the passive layer of stainless steel surfaces on your instruments and inside your washers.

Restore removes hard water scale deposits, rust (rouge) and stains. It saves time by eliminating the need to scrub down the washer chamber. Restore can also be used to neutralize high alkaline detergent residue. Best of all, it's phosphate-free and made from biodegradable ingredients. Try using Restore in your washers and on your instruments. You'll notice the difference in improved appearance and renewed functionality.

Ordering Information

Prolystica Restore® Descaler and Neutralizing Detergent

4L x 4 per case	1C45AW
10L x 1 per case	1C45T6WR
