

STERIS®

January 11, 2017

Dear Valued STERIS Customer,

This letter is to inform you that effective December 31, 2017, STERIS Corporation will no longer sell the following product:

AMSCO® Eagle® 3017 100% EO Sterilizer / Aerator

STERIS is discontinuing the sale of this product as a result of the introduction of the V-PRO® maX Sterilizer in 2011 and the V-PRO® 60 Sterilizer in 2014. Healthcare facilities globally have been transitioning to hydrogen peroxide gas sterilization for terminal low temperature sterilization over the years, and there is no longer demand from acute care healthcare facilities for onsite ethylene oxide sterilization.

STERIS will continue to support the Eagle 3017 Sterilizer as follows:

- Assuming replacement service parts availability, all service, Envirosystems™ Ethylene Oxide Sterilant, accessories, and sterility assurance products indicated for use with the Eagle 3017 Sterilizer will continue to be available for a minimum of 7 years.

STERIS strives to provide the highest level of Customer support in the industry. As part of that commitment, we want to provide you with sufficient advance notice of this product obsolescence and of our commitment to continue supporting the product as outlined above.

We recognize the impact that product obsolescence has on your operation. A recommended replacement for the Eagle 3017 Sterilizer is the V-PRO maX Sterilizer. A STERIS representative will contact you to provide additional information about the V-PRO maX and V-PRO 60 Sterilizers. If you have any questions regarding this notice, please do not hesitate to contact STERIS at 1-800-548-4873.

Sincerely,

Sarah Lazzara
Marketing Director, V-PRO
