

AMBULATORY SURGERY CENTERS

Procedure Through Reprocessing,
We Partner the Entire Way

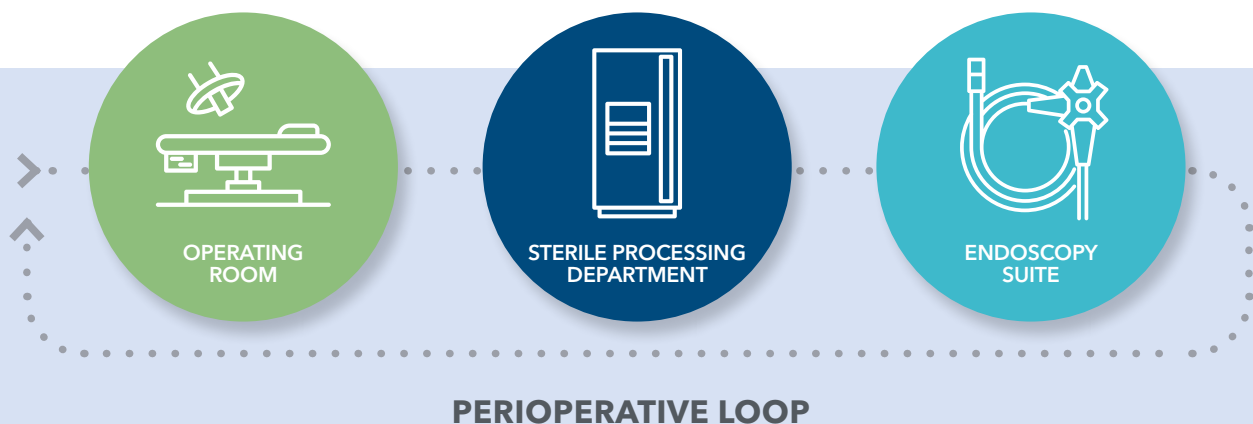

FUTUREPROOF YOUR CENTER WITH A TRUSTED PARTNER

As the number of outpatient procedures continues to see unprecedented growth, Ambulatory Surgery Centers (ASCs) are challenged to take on increased volume and complexity without compromising quality of care.

To scale your facility for the future and ensure you can support the anticipated procedural volume growth, you need a partner like STERIS that brings a wealth of knowledge and resources.

Our dedicated team of advisors can help you proactively plan and create a custom roadmap **across the entire perioperative loop** - starting in the Operating Room and Endoscopy Suite, and throughout Reprocessing. We have the expertise to ensure you can deliver the best possible outcomes for your patients, communities and facilities.

TAKING YOUR VISION AND MAKING IT A REALITY

The stakes are high, the pace is fast, and the standard of care cannot be compromised. Maximizing throughput and space requires a **flexible partner who adds value at every opportunity.**

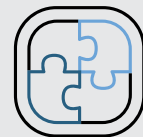

That's why every piece of equipment we make, every product we deliver, and every service we provide is one that you can rely on, case after case, day after day.

- **Enhance efficiencies** to ensure **optimal performance** across the perioperative loop
- Incorporate integrated technology to **improve workflows**
- Keep procedures on schedule to **deliver uninterrupted care**
- Optimize surgical environment capabilities to **deliver optimal clinical outcomes**
- Provide education and training platforms to **improve competency, compliance, and efficiency**

Unlock Your ASC's Full Potential with STERIS

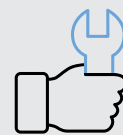

A plan to **increase annual procedural volume**

Collaborative partners building a **custom roadmap** for future success

Support across the entire perioperative loop

Comprehensive services to help overcome daily challenges

Design has a significant impact on a healthcare facility's performance. That's why our team partners with Customers throughout every step of the design process and the lifetime of your ASC.

WORKING TOGETHER TO MAKE PATIENTS' LIVES BETTER **IN THE OPERATING ROOM**

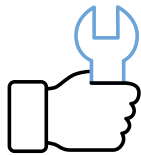

While patients and their families count on caregivers to deliver positive clinical outcomes, **you can count on STERIS to set up your Operating Room (OR) for success today and in the future.** We support your everyday needs with advanced technology and end-to-end support from our full team so you can **focus on what matters most: patient care.**

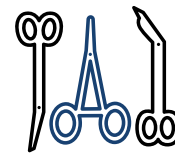

Create an OR that **supports innovation and future-readiness**

Increase productivity and uptime while **maximizing safety**

Utilize services that prolong the life and maximize the performance of your equipment

Ensure equipment and instrumentation are **procedure-ready**

With skilled, comprehensive instrument repair services, **our team helps you avoid** instrumentation damage, minimize costly repairs, and extend the instrument's life.

OPTIMIZE YOUR PROCESSES, COMPLIANCE & OUTCOMES IN THE STERILE PROCESSING DEPARTMENT

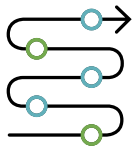

Instrumentation and infection prevention are critical in keeping the OR on schedule and ensuring **uninterrupted patient care**. As instruments and cases become more and more complex, efficient workflows and interconnected products, services, and technologies are critical to streamline operations. By partnering with STERIS, you gain a trusted partner in reprocessing to understand your unique needs of today and prepare you for the future.

Maximize efficiency and standardization to **support increasing case volumes & acuity**

Handle the unique and complex reprocessing needs of **robotic assisted** surgeries

Optimize reprocessing workflows to **improve accuracy and efficiency**

Choose from a broad portfolio of products that **support guidelines through each step** of reprocessing

Extend the life of your equipment and **minimize downtime** with regular preventive maintenance services and an extensive, trusted service team.

ACHIEVE GREATER EFFICIENCY IN THE ENDOSCOPY SUITE

As ASCs face challenges related to decreasing reimbursement, STERIS can provide support to **improve efficiency** and allow your GI Endoscopy suite to **increase procedural volume**. We do this by offering a complete list of offerings designed to help support you throughout every step of the endoscope reprocessing journey.

Improve product standardization, efficiency and maximize output to **support rising case volumes**

Address infection control concerns and adhere to **infection control guidelines**

Quickly process endoscopes, increase throughput, and **maintain a high level of patient care and compliance**

Ensure compliance with regulatory requirements and manufacturers' Instructions for Use

Avoid costly damages to your endoscopes and **enhance patient safety** with the help of the STERIS Flexible Endoscope Repair team.

OPTIMIZE YOUR PERFORMANCE TO ACCOMMODATE GROWING CASELOADS & COMPLEX INSTRUMENTATION DEMANDS

PLAN AND DESIGN YOUR RENOVATION OR NEW FACILITY

The STERIS Healthcare Design team can help guide you through initial ideation, final implementation and everything in between. Our team collaborates with architects, facility planners, and contractors to design and build healthcare spaces that support optimal patient care and facility outcomes. Once the design is created, our team helps you visualize your future ASC by leveraging cutting-edge technologies using 3D-rendered images, video animations, visual FX, and immersive experiences.

We partner with you throughout each step of the process using data and the latest technologies to deliver:

Service Partnership You Can Trust

Having your equipment and surgical instrumentation ready and always operating as needed is critical to your ability to deliver uninterrupted care to your patients. Our dedicated service team is close at hand and provides extensive service technician coverage across the United States to help ensure uptime and prolong the life of your equipment and instrumentation. Our service offerings include:

- Preventative Maintenance
- Equipment Service
- Device and Instrument Repair
- Critical Response Service
- Onsite Professional Services

Supporting a Strong Department Through Education

STERIS is dedicated to helping Customers keep pace with quality, compliance, and safety requirements, while working to achieve clinical and operational excellence.

Thanks to decades of combined industry knowledge, our team provides an education experience that meets your needs:

- **In-depth compliance assessments** and process improvements
- **STERIS University** continuing education - **onsite and on-demand 24/7**
- **Up-to-date insights** on industry standards and best practices
- **Training programs** for new hires, staff competencies & certification preparedness
