SPOR-KLENZ® Concentrate
Cold Sterilant

Precautionary Statements
Hazard to Humans and Domestic Animals.
DANGER - Corrosive. Causes irreversible burns. May be absorbed through skin. Do not get on eyes, on skin, or on clothing. Avoid contact with skin. Prolonged or frequent repeated skin contact may cause an allergic reaction in some individuals. Wash hands before eating, drinking, chewing gum, using tobacco or any other oral activity. The more contaminated the hands and wash before resume. Caution should be used when applying in indoor settings because pets may be at risk.

Personal Protective Equipment (PPE): Handlers must wear: Goggles or face shield, and protective rubber gloves.

Environmental Hazards: This product is toxic to birds, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, or oceans or public waters. Avoid contact with combustible material. This product may be used in fogging as an adjunct either preceding or following regular cleaning and disinfection procedures for hard, non-porous surfaces. Prior to fogging, remove or contain all flammable products and packaging materials. Ensure room is properly ventilated. Vatase all personnel from the room during fogging and for a minimum of 2 hours after fogging until the hydrogen peroxide air concentration is below 1 PPM. For fogging, open bright eye coverage. Virtual upper arms, eyes, and ears remain covered.

Disposal of Wastes: This product is to be used on hard, non-porous surfaces such as plastic, stainless steel objects, or glass. This product is not to be used as a terminal high level disinfectant on any critical/semi-critical medical device. Remove any obvious debris or organic material from the surface to be disinfected. This can be accomplished by rinsing with purified water. Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product. Use purified water to dilute SPOR-KLENZ Concentrate; SPOR-KLENZ Concentrate is a single-use product not intended for reuse.

FIRST AID

If inhaled: • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.

If on skin: • Wash the skin area thoroughly with soap and water. If any discomfort occurs, neutralize the product with 5% sodium bicarbonate solution (2 parts water and 1 part sodium bicarbonate), then rinse and wash with soap and water. • If any symptoms persist, call a physician.

If in eyes: • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing the eye. • Call a poison control center or doctor for treatment advice.

If swallowed: • Drink a large amount of water or milk. • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.

NOTICE TO PHYSICIAN

Possible mucosal damage may contaminate the use of gastric lavage.

For the sterilization and disinfection of hard surfaces and non-porous food contact surfaces.

For use in the following locations:

- Industrial Laboratories
- Pharmaceutical Laboratories
- Medical Products Manufacturers
- Electrical Utility Companies
- Dairy and Pasteurizing Facilities
- Beverage and Food Processing Plants

Sterilization and disinfection rates:

- *KILLS HIV-1 ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/ BODY FLUIDS: *Personal prophylaxis: Specific barrier protection items are used when handling items soaked with body fluids or objects that are disposable latex gloves, face mask, eye coverings, or on clothing.
- If on skin:
- If in eyes:
- If inhaled:

 Probable mucosal damage may contraindicate the use of gastric lavage. Treatment information. Have the product container or label with you when calling a poison control center or doctor, or call 1-800-424-9300, (703) 527-3887.

Inert Ingredients: 28.2%; 7.6% (fatty acid). Read the label before using this product.

Failure to follow directions for use may result in user injury.

Probable effects of overexposure:

- Local: Irritation; Chemical burns. Periodic medical examination recommended when using beyond the authorized amount and when in contact with the active ingredient. Use in accordance with directions for use.

STORAGE AND DISPOSAL

Do not pour into waterways. Do not pour into manholes or other wastewater collection systems. Do not pour into storm drains. Do not pour into drains foruddle, or into sewers to be drained into sanitary sewers. Do not pour into rain drains. Do not pour into sanitary sewers or any other means of waste disposal. This product is hazardous to aquatic life. Do not discharge effluent containing this product to lakes, streams, ponds, estuaries, oceans, public waters, or any other water body. Do not discharge effluent containing this product to lakes, streams, ponds, estuaries, or oceans or public waters. Avoid contact with combustible materials. This product may be used in fogging as an adjunct either preceding or following regular cleaning and disinfection procedures for hard, non-porous surfaces. Prior to fogging, remove or contain all flammable products and packaging materials. Ensure room is properly ventilated. Vatase all personnel from the room during fogging and for a minimum of 2 hours after fogging until the hydrogen peroxide air concentration is below 1 PPM. For fogging, open bright eye coverage. Virtual upper arms, eyes, and ears remain covered.

Disposal of Wastes: This product is hazardous to aquatic life and may be used in fogging. This product may be used in fogging as an adjunct either preceding or following regular cleaning and disinfection procedures for hard, non-porous surfaces. Prior to fogging, remove or contain all flammable products and packaging materials. Ensure room is properly ventilated. Vatase all personnel from the room during fogging and for a minimum of 2 hours after fogging until the hydrogen peroxide air concentration is below 1 PPM. For fogging, open bright eye coverage. Virtual upper arms, eyes, and ears remain covered. Top areas using one quart (946 ml) of resin volume with a 0.3% SPOR-KLENZ Concentrate solution. Allow surfaces to dry thoroughly before operations are resumed. Note: Once diluted, the solution must be used within 7 days. Discard any unused diluted solution.

DIRECTIONS FOR USE AS A GERMICIDAL DISINFECTANT SPRAY

For use on hard, non-porous surfaces such as plastic, stainless steel objects or Formica. Examples include counter tops, walls, floors, bathroom fixtures etc. Use on water or mechanical action, remove heavy soil and gross dirt from hard surfaces such as Formica, stainless steel or plastic. Dilute 5X with purified water. Note: Once diluted, the solution must be used within 7 days. Discard any unused diluted solution. Solution to surface or immerse items in a plastic spray bottle. Allow to remain on surface for 10 minutes. Let air dry or rinse with purified water. Drain off excess water, if possible, and allow to dry.

DIRECTIONS FOR USE AS A CLEANER/SANITIZER (FOOD CONTACT SURFACES)

For use on hard, non-porous surfaces such as plastic, stainless steel objects or Formica. Examples include counter tops, walls, floors, bathroom fixtures etc. Use on water or mechanical action, remove heavy soil and gross dirt from hard surfaces such as Formica, stainless steel or plastic. Dilute 5X with purified water. Note: Once diluted, the solution must be used within 7 days. Discard any unused diluted solution. Solution to surface or immerse items in a plastic spray bottle. Allow to remain on surface for 10 minutes. Let air dry or rinse with purified water. Drain off excess water, if possible, and allow to dry.

PRODUCT CLAIMS

- Sterilant; Sporicidal; Bactericidal; Virucidal (Hepatitis B, HIV-1); Fongicidal (100X) dilution 11 hours 20°C
- Non-tuberculosis mycobacterium (kathelaksis absinies); Pseudomonacidal; Broad Spectrum Disinfectant; Germicidal Spray disinfectant (100X) dilution 10 min. 20°C
- Cleaner/Sanitizer (food contact surfaces - Staphylococcus aureus and Enterococcus) (20X) dilution 1 min. 20°C
