

What You Can't See, Can Hurt You....

It's always been there

Aggressive pathogens on environmental room surfaces
can remain viable for extended periods of time.

...But the future looks bright...

 STERIS

...Ultraviolet bright.

STERIS, the world leader in infection prevention and sterilization, moves you forward with the PATHOGON™ UV Disinfection System for environmental room surfaces. The mobile-system, featuring germicidal ultraviolet light, may be used as part of a cleaning and disinfection program to reduce or kill pathogens on environmental surfaces.

To learn more about the PATHOGON™ UV Disinfection System, call 1-888-478-3747, or go to PATHOGON.com

American Ultraviolet
Since 1951. It's all we do.

STERIS is proud to partner with American Ultraviolet® in the development and manufacture of the PATHOGON™ UV Disinfection System. For more than 50 years, American Ultraviolet has manufactured the highest quality UVC germicidal fixtures for hospitals, laboratories, clean rooms, as well as commercial and residential applications throughout the world.
