

Improve Performance with a Clean Chamber

STERIS Instrument Management Services Patented Chamber Cleaning System

Over time, substances accumulate on chamber walls, possibly contaminating packs or hindering sterilizer performance. Our environmentally safe, patented, chamber cleaning system removes substances from chamber walls, without damaging the surface - improving the performance and extending the overall use-life of your sterilizer. Every chamber cleaning includes documentation of service and meets or exceeds The Joint Commission** & AAMI* equipment maintenance requirements - helping you stay compliant.

Our system is an environmentally safe, 3-5 hour automated process that can be scheduled during off hours.

A Clean You Can See

- ▶ Removes most substances built up on chamber walls that can contaminate sterile packs or lead to drain system blockage
- ▶ Improves drying and heat transfer within the chamber walls
- ▶ Improves sterilizer chamber aesthetics
- ▶ Can eliminate unnecessary downtime and chargeable service calls
- ▶ Compact and self-contained so that adjacent equipment can be used during cleaning
- ▶ Reduces contaminated and rejected packs
- ▶ Promotes easier routine cleaning

BEFORE

AFTER

*Process is enclosed (except on floor loader or non-STERIS units with various door sizes). Acid and alkaline are neutralized prior to disposal.

Call 1-800-783-9251 today to schedule your Sterilizer Chamber Cleaning at a time that works for you and your facility.

* AAMI ST79 Section 9.4 2013
