

Clearly an Advanced LED exam light

Harmony®LED385 Examination Lighting System

 **STERIS**

Problem

Sometimes, you only have a few seconds to make a critical diagnosis; you simply don't have time to waste. Halogen exam lights are dated technology. Your doctors need uncompromising light performance with a crisp, consistent spot to accurately diagnose patients.

Isn't there a way to give your doctors, trauma surgeons and ICU clinicians a better exam light?

Solution

STERIS has over 70 years of experience in surgical lighting innovation. We introduced the Harmony® LED Surgical Lighting and Visualization System that completely redesigned how you see in your operating room. Now, we are bringing that same cutting edge LED technology to examination lighting.

The Harmony LED385 Exam Lighting System delivers pure white, cool light to optimize your working environment:

- procedure and exam rooms
- ER / trauma departments
- labor and delivery suites
- ICU rooms

Harmony LED385 enables clear visualization to enhance patient care. Best-in-class lighting technology for everyone...clearly, that's a better idea.

Powerful, cool and ergonomic

Ultra-slim design features bright luminous intensity delivered in a compact design. LED lights don't emit the heat-producing light called infrared rays so it's just like the noonday sun, but without the heat.

- 50,000 lux of pure, bright white light for accurate diagnoses
- Crisp 5000° K color temperature at 90 CRI for vivid color rendition
- Compact light tucks neatly out of the way when not needed
- Fingertip controls allow instant adjustment of light intensity or turning light on/off
- Easy to clean; shatter resistant cover
- Ergonomic side handles to position light

Ceiling-mounted light

- Maximizes light positioning flexibility
- Extension arm and spring arm provide 5' 6" reach (1660 mm) for patient coverage

Mobile unit:

- Anti-static locking casters for stability
- Counterbalanced spring arm allows precise height adjustment from low lateral to overhead and anything in between

Ultraslim profile

Ergonomic side handles

Finger controls and sterilizable handle

Harmony® LED385 Examination Lighting System Specifications

Offering great optics and ease-of-use, the Harmony LED385 Examination Lighting System is another outstanding solution from STERIS Corporation!

The Harmony LED385 is a great addition to our complete line of LED lighting systems

| Feature | Harmony LED385 (typical) |
|---|--|
| Light intensity | <ul style="list-style-type: none"> • up to 50,000 Lux |
| Pattern size | <ul style="list-style-type: none"> • 6" fixed spot |
| Color temperature | <ul style="list-style-type: none"> • 5000° K |
| CRI (Color rendering index) | <ul style="list-style-type: none"> • 90 |
| Heat-to-light ratio (mW/m ² -lx) | <ul style="list-style-type: none"> • 3.4 |
| Average LED bulb life | <ul style="list-style-type: none"> • 30,000 hours |

Harmony LED System

White light that is green

Our innovations didn't stop at the clinical level – we also considered the environmental impact of our new exam light as well. These innovations not only save energy, they save you money.

- 30,000 hours of bulb life
- Consumes 2/3 less energy than halogen lights
- Sterilizable handle (no disposable lighthandle covers for the landfill)
- Made of 85% recyclable materials
- Packaging is 100% recyclable
