CS-iQ®

CS-IQ® WORKFLOW MANAGEMENT SOFTWARE

One Integrated Approach to Healthcare

STERIS

The three modules of CS-iQ software promote productivity, traceability and compliance across your department.

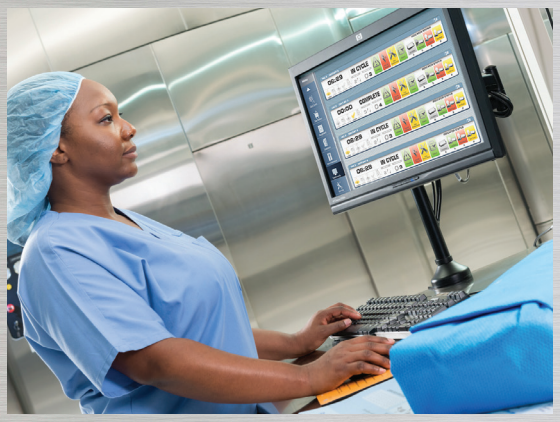
Each module provides solutions, starting with equipment compliance and advancing to an OR integrated proactive workflow management system for your entire perioperative instrument loop.

WORKFLOW MANAGEMENT MODULE

Proactively manage CSSD equipment, inventory and staff with technologies that enable you to be efficient and productive.

- Your facility will have real-time information available throughout, enabling you to make the right decision at the right time.
- The ability for you to prioritize production at each process step and work station.
- Real-time performance indicators that help you drive productivity, compliance, and quality.

Before



After

ELECTRONIC DOCUMENTATIONV MODULE

An effective, easy to implement and affordable management solution for CSSD and OR recordkeeping:

- Electronically manage documentation and record keeping, including sterilizer and washer tape data, biological and chemical indicator results
- Receive up-to-the-minute priority requests and processing parameters for each tray entering your CSSD
- Manage documentation including recall and productivity reports, IFUs, count sheets, and labels
- On-screen assembly and count sheet management for all your instrumentation

EQUIPMENT PERFORMANCE MANAGEMENT MODULE

CS-iQ®

- Real-time equipment monitoring for maximum uptime with auto fault notification to your in-house biomeds and managers
- The real-time visual dashboards provide proactive management for your CSSD equipment with interactive tasks for daily preventive maintenance, cleaning and testing
- Peace of mind is gained knowing your CSSD equipment is compliant to daily testing protocols
