Knee Restraint Strap (Pair)

The broad pads on these straps safely prevent the knee from flexing during surgery and feature a full-length VELCRO® Brand closure for a snug fit.

Description

Equipment Number: BF552

The broad pads on these straps safely prevent the knee from flexing during surgery and feature a full-length VELCRO® Brand* closure for a snug fit. Used in conjunction with the Split Leg Positioner, they are ideal for laparoscopic, colo-rectal, vascular, and extreme Reverse Trendelenburg procedures. This accessory is not manufactured with natural rubber latex.

Other Related Accessories:
