

## CS-iQ Sterile Processing Workflow Management Software

The three modules of CS-iQ software promote productivity, traceability and compliance across your department.

### Description

#### See, Act, and Excel with CS-iQ Sterile Processing Workflow Management Software

The three modules of CS-iQ software promote productivity, traceability and compliance across your department. As you add functionality with each module, your benefits increase, taking you from reactive management to proactive planning and helping your entire perioperative loop achieve higher levels of performance.

#### CS-iQ Sterile Processing Workflow Management Software Features:

- Real-time information available hospital wide to make the right decision at the right time
- Reduce paper by managing documentation and record keeping electronically, including capture of biological and chemical indicator results
- View and print equipment status reports including equipment monitoring results and daily maintenance notifications
- Gain peace of mind knowing that the functionality and uptime of your CSSD equipment is being tracked
- Real-time visual dashboards provide proactive management for CSSD equipment with reminders for preventative maintenance and daily service tasks
