

Vividimage® W 4K Wall Displays

- Large 65" viewing area
- Delivers four times the detail of HD displays
- Offers deeper color for greater depth perception
- Medical-grade and hospital-grade options

Description

The Vividimage® W 4K Wall Displays support team-wide visibility of 4K surgical video for synchronized activity, greater accountability and efficient procedural performance. Delivering four-times the detail of high-definition video, Vividimage® W 4K Wall Displays offer greater precision, improved visual depth and a wider color range to support effective procedures and better surgical outcomes.

- **True 4K** visualization meeting industry-best standards
- **Proven compatible** with today's HD and 4K devices.
- **Designed for staff comfort and safety**, offering a black bezel to reduce eye-strain.
- **Medical-grade and hospital-grade options** offer a solution for any room design or budget.
- **Pairs with Harmony iQ® Integration Systems** for a complete 4K integration solution end-to-end.
